SOFTWARE ENGINEER

Bachelor's Degree in Computer Science, experience in full-stack and low-code development, I bring strong expertise in building responsive front-end interfaces, scalable back-end systems, and enterprise applications using technologies like OutSystems, Laravel, Python, and MySQL. At MDEC, I do UI/UX improvements and accelerated digital solution delivery, while also mentoring junior developers and fostering agile practices. My background spans software lifecycle leadership, business process automation, and data dashboard development, enabling organizations to modernize operations, improve user experience, and make data-driven decisions efficiently.

CORE COMPETENCIES AND ACHIEVEMENTS

- **Front-End Development and UI/UX Excellence:** Demonstrated strong expertise in developing responsive and intuitive web interfaces at MDEC using modern front-end technologies and frameworks, ensuring seamless performance across devices and platforms. Collaborated closely with designers and back-end developers to deliver high-quality user experiences, while continuously refining UI elements to align with evolving user expectations and accessibility standards.
- **OutSystems Low-Code Development:** Leveraged OutSystems to accelerate application delivery, reduce development overhead, and ensure scalable and maintainable code. Played a central role in rapidly prototyping and deploying enterprise-grade applications, significantly improving time-to-market while maintaining consistency in architecture and user experience across MDEC's digital platforms.
- **Agile & Collaborative Software Engineering:** Actively participated in agile development cycles, sprint planning, and code reviews to ensure code quality and efficient resource management. Mentored junior developers, fostering a collaborative environment that emphasized best practices in version control, code structure, and continuous integration, resulting in smoother project execution and improved team performance.
- **Back-End System Development and API Integration:** Delivered robust and secure back-end solutions using Laravel and Core PHP, managing large-scale MySQL databases and integrating complex third-party APIs. Built Python-based tools to support internal analytics, contributing to MDEC's data-driven decision-making culture and enhancing backend performance across various services.
- **Business Process Automation & Internal Tooling:** At Uzma Engineering, led the automation of procurement workflows and developed internal systems that streamlined operations, reducing manual work and improving operational efficiency. Played a pivotal role in the digital transformation team, modernizing internal tools and aligning them with current business needs.
- **Data Analysis and Reporting Dashboards:** Designed and implemented SDMA solutions and custom dashboards using Analysis Services, enabling real-time insights and reporting for business stakeholders. This empowered teams to make faster, data-informed decisions and improved transparency across departments.
- **Full-Stack Web Development:** Built full-stack solutions using HTML, CSS, JavaScript, Python, Java, and MySQL across various roles, including at Velocity Technology and Aramis Group. Created proprietary CMS platforms and cross-browser-compatible websites, enhancing digital presence and reducing client overhead through scalable, maintainable systems.
- **Software Lifecycle Leadership and Mentoring:** Took leadership roles in various stages of the software lifecycle—from requirements gathering to deployment, while mentoring junior developers and promoting agile methodologies. This leadership helped improve sprint velocity, reduce technical debt, and build a stronger, more capable development team.
- **Systems Utilization and Technology Skills.** Proficient in Windows and Mac operating systems with strong systems utilization and technology skills, including advanced use of MS Office Suite (Word, Excel, PowerPoint) and expertise in programming languages (PHP, JavaScript, Python, HTML, CSS), frameworks (Laravel, CodeIgniter, Flask, Next.js, OutSystems), version control (Git), databases (MySQL, PostgreSQL, MongoDB), reporting tools (Crystal Reports, Excel), as well as experience in API design and integration, front-end and CMS development, ERP systems, SDMA, data analysis, and Agile methodologies.

PROFESSIONAL EXPERIENCE

Front-End & OutSystems Developer

Malaysian Digital Economy Corporation (MDEC)

Feb 2023 – Present

Design and develop intuitive web interfaces to elevate user experience. Utilize the OutSystems low-code platform for rapid, scalable app deployment. Collaborate with cross-functional teams on responsive design implementation, agile sprint planning, and scalable architecture. Conduct code reviews and mentor junior developers to uphold coding standards and foster team growth.

Backend Developer

Malaysian Digital Economy Corporation (MDEC)

Oct 2021 – Sep 2022

Developed backend systems using Laravel and Core PHP, supporting multiple frontend integrations. Built Python scripts for internal data analytics and decision-making. Managed API integrations and large-scale MySQL datasets to ensure high performance and data integrity.

Software Engineer

Uzma Engineering Sdn Bhd

Jul 2018 – Oct 2021

Automated procurement workflows and developed internal web tools, enhancing operational efficiency. Led development of SDMA solutions and business reporting models using Analysis Services, enabling real-time analytics. Supported digital transformation initiatives across departments.

Web Developer

Aramis Group, Mont Kiara

Apr 2017 – Jun 2018

Created and maintained responsive, cross-browser web applications. Collaborated closely with design and backend teams to deliver seamless UX. Improved system reliability and performance through rigorous testing, debugging, and Git version control practices.

Software Engineer & Web Developer

Velocity Technology, Subang Jaya

Jan 2010 – May 2016

Led full-stack development of custom web applications and CMS platforms tailored to client needs. Delivered scalable solutions using JavaScript, Python, and Java. Mentored junior developers and implemented agile methodologies, improving delivery timelines and team productivity.

EDUCATION AND TRAINING

Universiti Teknologi MARA

Bachelor's Degree in Computer Science

Institute Profesional Baitulmal

Diploma in Computer Science
